

## TFS - Herbs Fresh Oregano - Information

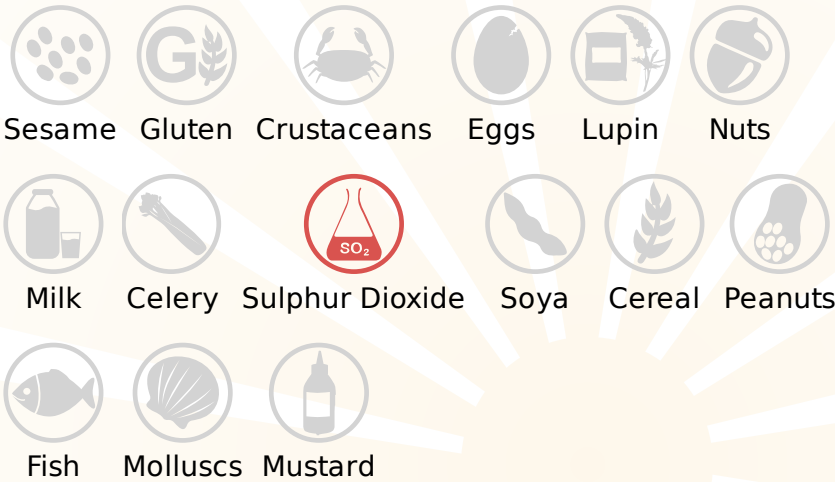

Oregano is a shrub-like herb with multiple-branched stems, growing either upright or in a creeping manner, depending on the variety. It can grow as tall as three feet in height. The leaves are narrow and pinnate, or arrow-shaped, and have a soft, fuzzy texture. They grow in pairs, well-spaced out along tender stems. As the plant grows, the more mature stems become woody at the base. In the late summer, small white flowers bloom from the flower spikes (bracts) at the top of the stems. Oregano is said to have a 'balsamic' flavour; a combination of mint (a closely related herb), thyme, and rosemary. The taste is strong and somewhat bitter.
